Philosophy of Mind

The New York Times bestselling self-portrait of a flawed but determined Jesse James: rebel, outlaw, gearhead, artist, entrepreneur, lost son, and fiercely committed father. Jesse James is everything you imagined him to be—and more than you ever expected. He has led a violent life. He's survived lower depths, faced harder times, and beaten down more private demons than most—and lived to tell

his story with honesty, introspection, and humility. He's tough as nails and riding hard through life, with plenty of wisdom to share about taking a hit and coming back up. In *American Outlaw*, Jesse reveals all: from his volatile upbringing and troubled relationship with his father to his wild days of car thieving and juvenile detention; from knocking heads as a rock 'n' roll bodyguard to his destructive drinking and barroom brawling; from building an empire from the ground up to marriages marked with both happiness and gut-wrenching pain; from living inside the hottest level of paparazzi hell to rehab and making peace with his past.

Martin Heidegger's work is pivotal in the history of modern European philosophy.

The New Heidegger presents a comprehensive and stimulating overview of, and introduction to, the work of one of the most influential and controversial philosophers of our time. Heidegger has had an extraordinary impact on contemporary philosophical and extra-philosophical life: on deconstruction, hermeneutics, ontology, technology and techno-science, art and architecture, politics, psychotherapy, and ecology. The New Heidegger takes a thematic approach to Heidegger's work, covering not only the seminal Being and Time, but also Heidegger's lesser known works. Lively, clear and succinct, the book requires no prior knowledge of Heidegger and is an essential resource for anyone studying or teaching the work of this major modern philosopher.

The choice of structural design and material is essential in preventing the external walls of a vessel from buckling under pressure. In this revised second edition of *Pressure vessels*, Carl Ross reviews the problem and uses both theoretical and practical examples to show how it can be solved for different structures. The second edition opens with an overview of the types of vessels under external pressure and materials used for construction. Axisymmetric deformation and different types of instability are discussed in the following chapters, with chapters 5 and 6 covering vibration of pressure vessel shells, both in water and out. Chapters 7 and 8 focus on novel pressure hulls, covering design, vibration and collapse, while chapters 9 and 10 concentrate on the design and non-linear analysis of submarine pressure hulls under external hydrostatic pressure. In chapter 11, the design, structure and materials of deep-diving underwater pressure vessels are discussed, focusing on their application in missile defence systems. Finally, chapter 12 analyses the vibration of a thin-walled shell under external water pressure, using ANSYS technology. Drawing on the author's extensive experience in engineering and design both in an industrial and academic capacity, the second edition of *Pressure vessels* is an essential reference for stress

The Power of Henry's Imagination (The Secret)

From esteemed military historian J.L. Granatstein, the story of one of Canada's finest moments. This is the story of the First Canadian Army, which fought its way from Juno Beach on D-Day in June 1944 through Normandy, liberated the

Netherlands and helped finally defeat Germany in 1945. What our army needed was more battle experience, and this it gained in the costly efforts in Normandy to reach the city of Caen and then to close the Falaise Gap. This was followed by hard fighting to take the ports along the Channel coast and terrible combat in dreadful conditions to clear the Scheldt estuary. After a winter of “rest” around Arnhem, the First Canadian Army crossed the Rhine, drove the Germans out of the Reichswald and then participated as the major player in the joyous liberation of the Netherlands. This is also the story of how Canada, which had no army to speak of in 1939, mobilized its men, women and industrial resources to raise a military of 1.1 million from a population of only eleven million and turned it into one of the very best fighting armies in the Second World War. The army trained and learned on the job, and though the losses were high (with many killed and wounded), the Canadians were able to defeat a battle-hardened enemy with skill, courage and persistence over the course of eleven months in 1944 and 1945.

Beaming Sonny Home

Between 1660 and 1820, Great Britain experienced significant structural transformations in class, politics, economy, print, and writing that produced new and varied spaces and with them, new and reconfigured concepts of gender. In mapping the relationship between gender and space in British literature of the period, this collection defines, charts, and explores new cartographies, both geographic and figurative. The contributors take up a variety of genres and discursive frameworks from this period, including poetry, the early novel, letters, and laboratory notebooks written by authors ranging from Aphra Behn, Hortense Mancini, and Isaac Newton to Frances Burney and Germaine de Staël. Arranged in three groups, Inside, Outside, and Borderlands, the essays conduct targeted literary analysis and explore the changing relationship between gender and different kinds of spaces in the long eighteenth century. In addition, a set of essays on Charlotte Smith's novels and a set of essays on natural philosophy offer case studies for exploring issues of gender and space within larger fields, such as an author's oeuvre or a particular discourse. Taken together, the essays demonstrate

space's agency as a complement to historical change as they explore how literature delineates the gendered redefinition, occupation, negotiation, inscription, and creation of new spaces, crucially contributing to the construction of new cartographies in eighteenth- and early nineteenth-century England.
