Hearing Assistive and Access Technology

Dive into the ghostly world of the supernatural with America's leading paranormal investigator Inside, paranormal investigator, star, and executive producer of The Travel Channel's hit series, Ghost Adventures and founder of the award-winning Haunted Museum (Las Vegas' most popular attraction), Zak Bagans takes readers on an exciting journey into the supernatural world. With insider information on the history of ghost-hunting to learning about ghosts with all kinds of temperaments, Ghost-Hunting For Dummies is peppered with true accounts and stories from Bagans' famous cases and investigations. Featuring expert advice on picking a haunted location, setting up cameras, and dealing with unwieldy ghosts, this book shows how today's investigators use the tools of modern science to study a wide range of paranormal activity. Take an exciting adventure into the supernatural world Explore haunted sites Get messages from beyond the grave Read true accounts from famous cases and investigations If you're one of the countless fans of Ghost Adventures itching to get off the couch and track some spirits on your own, this book provides everything you need to know to conduct a successful paranormal investigation.

OR 2.0 Context-Aware Operating Theaters, Computer Assisted Robotic Endoscopy, Clinical Image-Based Procedures, and Skin Image Analysis

This book presents a selection of empirical papers dealing with second and multiple language acquisition, in which

qualitative research methodology is employed. Each of the studies reported in individual chapters is based on a solid theoretical background and an overview of studies in a given area. Although the main focus is on qualitative methods, some of the papers demonstrate the complementarity of quantitative and qualitative approaches in studying language acquisition.

Software Studies

This open access book explores ways to leverage information technology and machine learning to combat disease and promote health, especially in resource-constrained settings. It focuses on digital disease surveillance through the application of machine learning to non-traditional data sources. Developing countries are uniquely prone to large-scale emerging infectious disease outbreaks due to disruption of ecosystems, civil unrest, and poor healthcare infrastructure – and without comprehensive surveillance, delays in outbreak identification, resource deployment, and case management can be catastrophic. In combination with context-informed analytics, students will learn how non-traditional digital disease data sources – including news media, social media, Google Trends, and Google Street View – can fill critical knowledge gaps and help inform on-the-ground decision-making when formal surveillance systems are insufficient.

The Perfect Thing

Global Sources Electronics

Podcasting for Learning in Universities details several examples of research to practice for the successful use of podcasts in Higher Education, drawing from studies in the UK, Australia and South Africa. The book offers a practical transferable model and guidelines for integrating podcasts in higher education contexts. There is a dedicated website at www.podcastingforlearning.com with further links and examples. "The sheer range of ideas for using podcasts shown by the case studies, will hopefully spark off a number of ideas for ways in which practice in one subject can be re-used in another. Case studies covering reflective learning, active learning, students voices, fieldwork, distance learning and learning transferable skills, show that podcasts are flexible enough as a medium to deliver effective learning outcomes regardless of the subject." ESCalate, 2nd October 2008. To read more of the ESCalate review [click here](#). "This book is exactly what is required for a wide range of potential readers - it is practical, yet derived from research; it is focused on student learning, yet has a technical component; it is leading-edge, yet it draws on many case studies." Professor Robin Mason, The Open University, UK "I recommend this book to all academics in higher education." Peter Bullen, Ford Professor of Automotive Engineering, University of Hertfordshire, UK "This book shows how podcasts can help transform the teaching

and learning experience in Higher Education a blueprint for podcast use." Professor David Nicol, University of Strathclyde, Scotland "The students' views are represented strongly throughout the book, which helps to make it a compelling and extremely worthwhile read." Dr Linda Creanor, Glasgow Caledonian University, Scotland "Finally, a Podcasting Bible for education!" Mazlan Hasan, Senior Instructional Designer, National Institute of Education, Singapore "The 10-step pedagogic model for developing podcasting provides an essential step-by-step guide for anyone venturing into this area for the first time." Richard Wallis, TwoFour Learning "After reading this book, I am attracted to offering another flexible learning choice. Podcasting affords active learning whether individual, cooperative or collaborative contributions, either formal or informal." Denise Nelson, Course Designer, SIAST Virtual Campus, Canada Contributors: Marialuisa Aliotta, Simon Bates, David Bell, Keith Brunton, Chris Cane, Annette Cashmore, Claire Chambers, Brian Cox, Chris Dennett, Stuart Downward, Palitha Edirisingha, John Fothergill, Derek France, Martin Jenkins, Mark J. W. Lee, David Livingstone, Jo Lonsdale, Kenny Lynch, Raymond Macharia, Matthew Mobbs, Richard Mobbs, Nick Mount, Dick Ng'ambi, Ming Nie, Chris Ribchester, Libby Rothwell, Gilly Salmon, Nick Short, Adam Stevens, John Traxler, Belinda Tynan and Kim Whittlestone.

Fretboard Theory

Creating a Better World

Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert, George Sand, Robyn Davidson, and Sara Wheeler.

The Proceedings of the AES International Conference

Peggy Natiello's collection of work has become a favourite amongst students on Person-Centred courses throughout the UK. It is a scholarly, much referenced work on collaborative power and gender issues.

Making the Move to RDA

The Person-Centred Approach

Get going on the Fast Track to a successful career Whether you're gearing up for interviews, or deciding where to start your job search, this book is packed with the no-nonsense stats and critical information you need to launch your career. Based on BusinessWeek's famous rating system, this at-a-glance guide answers all your questions, including: How can I stand out to top companies? Tips, anecdotes, and up-to-date information on interview killers Who's got the best internship and full-time positions for recent graduates? Resume-building opportunities each employer offers What kinds of experience are employers looking for? Ways to make even your summer life guarding job work in your favor What's it worth? Starting salaries, signing bonuses, and more With Web links, phone numbers, company profiles, and insights from new employees, this guide is all you need to find the perfect fit for your career-and get started on the fast track for life.

Listening to Young Children

Literacy Research Methodologies

Making the Move to RDA: A Self-Study Primer for Catalogers is aimed at MARC catalogers who currently create AACR2 records and need to transition to the new Resource Description and Access (RDA) environment. Since both RDA's structure and content differ from AACR2 in many respects, this primer will first detail the development and rationale for RDA as well as its intended goals, principles, and objectives. It will then explain RDA's theoretical underpinnings—collectively known as the FRBR Family of Models.

A fast and easy way to write winning white papers! Whether you're a marketing manager seeking to use whitepapers to promote your business, or a copywriter keen to break into this well-paying field, White Papers For Dummies gives you a wealth of practical, hands-on advice from one of the world's leading experts in the field. The fact-based documents known as white papers have been called the "king of content." No other B2B marketing piece can do more to generate leads, nurture prospects, and build mindshare. Where white papers were once used only by technology firms, they are becoming "must-have" items in the marketing toolkit for almost any B2B firm. Practically every startup must produce a white paper as

part of its business planning. But writing effective white papers is a big challenge. Now you can benefit from the experience of a white paper specialist who's done more than 200 projects for clients from Silicon Valley to Finland, from mighty Google to tiny startups. Author Gordon Graham—also known as That White Paper Guy—provides dozens of tips and tricks to help your project come together faster and easier. *White Papers For Dummies* will help you to: Quickly determine if your B2B firm could benefit from a whitepaper Master the three phases of every white paper project: planning, production, and promotion Understand when and how to use the three main types of whitepaper Decide which elements to include and which to leave out Learn the best practices of seasoned white paper researchers and writers Choose from 40 different promotional tactics to get the word out Avoid common mistakes that many beginners make

Studying Second Language Acquisition from a Qualitative Perspective

Listening in the Ocean

PC Magazine

On October 23, 2001, Apple Computer, a company known for its chic, cutting-edge technology -- if not necessarily for its dominant market share -- launched a product with an enticing promise: You can carry an entire music collection in your pocket. It was called the iPod. What happened next exceeded the company's wildest dreams. Over 50 million people have inserted the device's distinctive white buds into their ears, and the iPod has become a global obsession. The Perfect Thing is the definitive account, from design and marketing to startling impact, of Apple's iPod, the signature device of our young century. Besides being one of the most successful consumer products in decades, the iPod has changed our behavior and even our society. It has transformed Apple from a computer company into a consumer electronics giant. It has remolded the music business, altering not only the means of distribution but even the ways in which people enjoy and think about music. Its ubiquity and its universally acknowledged coolness have made it a symbol for the digital age itself, with commentators remarking on "the iPod generation." Now the iPod is beginning to transform the broadcast industry, too, as podcasting becomes a way to access radio and television programming. Meanwhile millions of Podheads obsess about their gizmo, reveling in the personal soundtrack it offers them, basking in the social cachet it lends them, even wondering whether the device itself has its own musical preferences. Steven Levy, the chief technology correspondent for Newsweek magazine and

a longtime Apple watcher, is the ideal writer to tell the iPod's tale. He has had access to all the key players in the iPod story, including Steve Jobs, Apple's charismatic cofounder and CEO, whom Levy has known for over twenty years. Detailing for the first time the complete story of the creation of the iPod, Levy explains why Apple succeeded brilliantly with its version of the MP3 player when other companies didn't get it right, and how Jobs was able to convince the bosses at the big record labels to license their music for Apple's groundbreaking iTunes Store. (We even learn why the iPod is white.) Besides his inside view of Apple, Levy draws on his experiences covering Napster and attending Supreme Court arguments on copyright (as well as his own travels on the iPod's click wheel) to address all of the fascinating issues -- technical, legal, social, and musical -- that the iPod raises. Borrowing one of the definitive qualities of the iPod itself, *The Perfect Thing* shuffles the book format. Each chapter of this book was written to stand on its own, a deeply researched, wittily observed take on a different aspect of the iPod. The sequence of the chapters in the book has been shuffled in different copies, with only the opening and concluding sections excepted. "Shuffle" is a hallmark of the digital age -- and *The Perfect Thing*, via sharp, insightful reporting, is the perfect guide to the deceptively diminutive gadget embodying our era.

White Papers For Dummies

All you need to track and record paranormal activity! Ectoplasm cold spots orb everyone loves a real-life ghost story! Ghosthunter Melissa Martin Ellis takes you on an exciting journey into the supernatural world of haunted sites, restless souls, and messages from beyond the grave. You'll learn about the most up-to-date technology, such as motion sensors and highly sensitive digital cameras, as well as the supernatural phenomena themselves, including: Poltergeists Electronic-voice phenomena (EVP) Possession Photo anomalies Seances and voodoo rituals With expert advice on everything from picking a haunted location to setting up cameras and dealing with unwieldy ghosts, *The Everything Ghost Hunting Book, 2nd Edition* shows you how today's investigators use the tools of modern science to study a wide range of paranormal activity.

Postindustrial East Asian Cities

Leveraging Data Science for Global Health

This collection of short expository, critical and speculative texts offers a field guide to the cultural, political, social and aesthetic impact of software. Experts from a range of disciplines each take a key topic in software and the understanding of software, such as algorithms and logical structures.

The Everything Ghost Hunting Book

Criticism has indicated that inadequate academic observance has been spent on the adaptation and implementation of generic Business Performance Measurement (BPM) models to specific industry and company contexts leading to a suboptimal practical feasibility. In reflecting these concerns, an approach to improve BPM feasibility is developed based on an industry's specific characteristics. These characteristics are then linked to corresponding generic BPM models. In this vein, practitioners shall be assisted in designing and implementing a sustainable BPM system. This approach gets empirically validated for the Metal Finishing Industry in Germany and the United Kingdom. [Subject: Business]

Ghost-Hunting For Dummies

This title brings to light the discoveries and insights into the lives of many marine species made possible over the last decade by passive acoustic recorders (PAR). Pop-ups, ARF, HARP, EAR, Bprobe, C-POD Atag, and Dtag are the acronyms of some of the many PARs that have changed our understanding of how marine animals live and strive in the ocean. Various types of PARs are used by different investigators in different areas of the world. These recorders have accumulated copious amounts of very important data, unveiling previously unknown information about large marine animals. Temporal, seasonal and spatial distribution patterns have been uncovered for many marine species. There have been many discoveries, new understandings and insights into how these animals live in and utilize the ocean and the importance of acoustics in their lives. Listening Within the Ocean summarizes these important discoveries, providing both a valuable resource for researchers and enjoyable reading for non-professionals interested in marine life.

Mac 911

We need to play with media to become more effective communicators. This book was written to inspire and empower you, as a creative person, to expand your personal senses of digital literacy and digital agency as a multimedia communicator. As you learn to play with digital text, images, audio and video, you will communicate more creatively and flexibly with a wider variety of options. Although written primarily for educators, anyone who is interested in learning more about digital communication will learn something new from this book. As children, we learn to progressively make sense of our confusing world through play. The same dynamics apply to us as adults communicating with new and different media forms.

Single-Session Integrated CBT (SSI-CBT)

Podcasting for Learning in Universities

Ziff Davis Smart Business for the New Economy

A friendly introduction to the basics of focus group methods with an international feel and an ethical sensibility.

Elle

Until quite recently, therapist training was predicated on the notion that therapy is an ongoing process. Single-Session Integrated CBT (SSI-CBT) questions this. In this book, Windy Dryden takes long standing research on SSI therapy and transfers it to the field of CBT in a timely and conceptual application. Based on his extensive work demonstrating the benefits of single-session CBT to public and professional audiences, Dryden has developed a single-session approach for work in the therapy and coaching fields. Comprising 30 key points, and divided into two parts - Theory and Practice - this concise book covers the key features of SSI-CBT. It will offer essential guidance for students and practitioners experienced in CBT, as well as practitioners from other theoretical orientations who require an accessible guide to the distinctive theoretical and practical features of this exciting new approach.

The Theory and Practice of Online Learning

Do you love sitting at home playing guitar, but find yourself playing the same old things over and over without making much progress? When other musicians invite you to jam, do you worry that you won't be able to keep up? Are you a veteran guitarist who has played for years, but you're embarrassed to admit you have no idea what you're doing? If you want to take your guitar playing to the next level, compose songs like you hear on the radio, and improvise your own music, then you need Fretboard Theory. Fretboard Theory by Desi Serna teaches music theory for guitar including scales, chords, progressions, modes and more. The hands-on approach to theory shows you how music "works" on the guitar fretboard by visualizing shapes and patterns and how they connect to make music. Content includes: * Learn pentatonic and major scale patterns as used to play melodies, riffs, solos, and bass lines * Move beyond basic chords and common barre chords by playing the types of chord inversions and chord voicings used by music's most famous players * Chart guitar chord progressions and play by numbers like the pros * Identify correct scales to play over chords and progressions so you can improvise at will * Create new sounds with music modes and get to know Ionian, Dorian, Phrygian, Lydian, Mixolydian, Aeolian and Locrian * Add variety to your playing by using intervals such as thirds, fourths, and sixths * Increase your chord vocabulary by using added chord tones and extensions to play chord types such as major 7, minor 7, sus2, sus4, add9, and

more * Learn how all the different aspects of music fit together to make a great song * See how theory relates to popular styles of music and familiar songs Fretboard Theory will have you mastering music like a pro easier and faster than you ever thought possible. Plus, it's the ONLY GUITAR THEORY RESOURCE in the world that includes important details to hundreds of popular songs. You learn how to play in the style of pop, rock, acoustic, blues, and more! This guitar instruction is perfect whether you want to jam, compose or just understand the music you play better. The material is suitable for both acoustic and electric guitar, plus it features many references to bass. Level: Recommended for intermediate level players on up. Video Fretboard Theory is also available as a 21-hour video series that is sold separately on the author's GuitarMusicTheory.com website. Visit the website and sign up for email lessons to sample the footage. Fretboard Theory Volume II When you're ready to take your playing to the next level, get the second book in the series, Fretboard Theory Volume II, which is also available as a 12-hour video series.

Stereo Review's Sound & Vision

Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in-depth reviews.

Feminism and the Politics of Travel After the Enlightenment

Balanced and authoritative, this volume brings together leading experts to present thirteen methodologies widely used in literacy research. Following a consistent format, each chapter describes the methodology at hand, identifies the types of questions and claims for which it is well suited, delineates clear standards for quality, and presents one or more exemplary studies using the methodology. Studies are cited in each chapter and can be easily referenced and the chapters follow similar formats, making this an easy text to use. Guiding readers to choose wisely from available methodologies when designing their own research endeavors, and to understand the contributions that each mode of inquiry can generate - this is an essential text for graduate students in literacy. It is also an ideal resource for more experienced researchers seeking to build their skills for utilizing or evaluating particular approaches.

The Mosaic approach views children as 'experts in their own lives', and offers a creative framework for listening to young children's perspectives. At a time of shifting policy in early years, this second edition offers a timely reminder that listening to young children is still important for reviewing service provision. The Mosaic approach has been applied by practitioners throughout the world. This new edition reflects on the authors' original ground-breaking work, with new introductions, updates and examples of how the Mosaic approach has been adapted, and offers case studies that will encourage

practitioners to use the framework in their own setting. will be of interest to policy makers, practitioners in nurseries, children's centres, pre-schools and schools and residential settings. It will also be welcomed by early childhood students and other researchers who are engaged in searching for new theoretical, practical and imaginative ways of listening to young children.

Business Performance Measurement in the Metal Finishing Industry

This book constitutes the refereed joint proceedings of the First International Workshop on OR 2.0 Context-Aware Operating Theaters, OR 2.0 2018, 5th International Workshop on Computer Assisted Robotic Endoscopy, CARE 2018, 7th International Workshop on Clinical Image-Based Procedures, CLIP 2018, and the First International Workshop on Skin Image Analysis, ISIC 2018, held in conjunction with the 21st International Conference on Medical Imaging and Computer-Assisted Intervention, MICCAI 2018, in Granada, Spain, in September 2018. The 11 full papers presented at OR 2.0 2018, the 5 full papers presented at CARE 2018, the 8 full papers presented at CLIP 2018, and the 10 full papers presented at ISIC 2018 were carefully reviewed and selected. The OR 2.0 papers cover a wide range of topics such as machine vision and perception, robotics, surgical simulation and modeling, multi-modal data fusion and visualization, image analysis, advanced imaging, advanced display technologies, human-computer interfaces, sensors. The CARE papers cover topics to advance the field of computer-assisted and robotic endoscopy. The CLIP papers cover topics to fill gaps between basic science and clinical applications. The ISIC papers cover topics to facilitate knowledge dissemination in the field of skin image analysis, as well as to host a melanoma detection challenge, raising awareness and interest for these socially valuable tasks.

Blood and Earth

This easy-to-use guide covers troubleshooting tips and tricks for Mac hardware and software, written by the well-known Macworld columnist and Macintosh guru Chris Breen. The book contains troubleshooting tips and techniques for both Mac OS 9 and OS X, and additional projects for making a Macintosh more productive-sharing files, making Mac OS X work more like Mac OS 9, and more.

Los Angeles Lawyer

Drawing on a wide range of literature and on interviews with firms, this book explores issues of economic growth with a focus on six East Asian cities: Bangkok, Beijing, Seoul, Shanghai, Singapore, and Tokyo. It suggests how policies and institutions can induce and furnish an urban environment that supports innovative activities. A valuable resource for researchers, urban planners, urban geographers, and policy makers interested in East Asia.

Focus Group Methodology

The Healthy Writer: Reduce your pain, improve your health,

"BLOOD AND EARTH is a gripping account of the deadly link between slavery and environmental destruction. Kevin Bales is a social scientist, human rights activist, and journalist -- and he's also one of the world's leading experts on modern slavery. In his work he began to notice the connection between environmental decline and slavery: the two almost always went hand-in-hand, whether in the hellish gold mines of Ghana or the miraculously beautiful mangrove forests of Bangladesh. But why? He set off to find the answer on a fascinating and moving journey that took him into the lives of modern day slaves and along a supply chain that leads directly to the cell phones in our pockets. He found solutions that redeemed both the lives of the slaves in the world's most threatened places and the environments they live in. This is a clear-eyed, inspiring, and profoundly hopeful book that brings us dramatic stories from the world's environmental and human rights hotspots and offers solutions to our most pressing crises"--

Playing with Media

Neither an academic tome nor a prescriptive 'how to' guide, The Theory and Practice of Online Learning is an illuminating collection of essays by practitioners and scholars active in the complex field of distance education. Distance education has evolved significantly in its 150 years of existence. For most of this time, it was an individual pursuit defined by infrequent postal communication. But recently, three more developmental generations have emerged, supported by television and radio, teleconferencing, and computer conferencing. The early 21st century has produced a fifth generation, based on autonomous agents and intelligent, database-assisted learning, that has been referred to as Web 2.0. The second edition of "The Theory and Practice of Online Learning" features updates in each chapter, plus four new chapters on current distance education issues such as connectivism and social software innovations.
