Heneman and Judge's Staffing Organizations, 7/e, is based on a comprehensive staffing model. Components of the model include staffing models and strategy, staffing support systems (legal compliance,

planning, job analysis and rewards), core staffing systems (recruitment, selection, employment), and staffing system and retention management. Up-to-date research and business practices are the hallmarks of this market leading text. In-depth applications (cases and exercises) at the end of chapters provide students with skill-building and practice in key staffing activities and decision-making. A comprehensive running case involving a fictitious retailing organization provides even greater opportunity for in-depth analysis and skill building. Students also have the opportunity to address ethical issues at the end of each chapter.

"The volume provides education leaders and policymakers with practical guidance on how to make each dollar go further-whether a given dollar is "old" or "new." This book identifies insights, lessons, and suggestions that can help schools spend their funds effectively. The volume is focused on solutions-ways school systems can prioritize and make tradeoffs that can help them spend their dollars more effectively- and more general lessons for how leaders can and should think about these issues. The book

provides policy-specific recommendations. When it comes to school spending, getting more bang for the buck is never just a matter of spending on "what works." It's a complicated calculus of student needs, available resources, political realities, and local context. That's why school spending should never be a mechanical task, but an educational exercise-and an opportunity to discover more promising paths forward. This book guides readers through this journey of school spending"--
