A Case Study on Petronas Globalization

Strategic Business Analysis shows students how to carry out a strategic analysis of a business, with clear guidelines on where and how to apply the core strategic techniques and models that are the integral tools of strategic management. The authors identify the key questions in strategic analysis and provide an understandable framework for answering these questions. Several case studies are used to focus understanding and enable a more thorough analysis of the concepts and issues, especially useful for students involved with case study analysis. Accompanying the text is a CD-Rom containing the models, tutorial guidance, and a PowerPoint presentation. A blank template is provided for each model, enabling students to actively interact and enter their own data - an effective 'what if' facility. This will enable students to appreciate the limitations as well as the advantages of the strategic models.

Seminar paper from the year 2007 in the subject Business economics - Business Management, Corporate Governance, grade: 72/100 credits, University of Glamorgan (Business School), course: Strategic Management II, language: English, abstract: This paper aims to analyse strategy content, context, and organisational purpose of Dell Inc., one of the world's largest computer manufacturers. Dell's direct business model based on virtual integration, low inventory, and direct relationships is evidently a key source of competitive advantage on several levels. Underpinning key findings from a critical evaluation of a variety of factors, in particular the computer industry and international dimensions of Dell's value system, strategic challenges for the company would include three key issues: first, Dell should address its weak performance in terms of customer service. Second, since Dell's current sales to corporations account for about 85 per cent, the author recommends a stronger focus on the more lucrative high-growth private consumer segment. Finally, Dell will have to successfully exploit opportunities on the fast-growing, but extremely competitive markets of Asia-Pacific. This paper is based on information from publicly available sources. No internal/confidential information of the organisation involved has been used.

Most business schools use case studies in their courses. However, these are typically based on past cases and assigned to students to solve. This book describes a new approach for teaching with case studies, which was developed and applied successfully at TUM School of Management. In this approach, student teams write and solve their own case study on a topic concerning current and future businesses. A case can thus be on their own startup or a strategic decision of existing companies. During the course, the students receive intensive coaching while selecting and developing the case topic by the course advisors as well as feedback by industry experts and executives for whom the case is actually a burning question. The authors present 17 cases covering strategic questions for startups and technology companies such as Deutsche Post, BMW, Ryanair, Lufthansa, Stadtwerke München, Fielmann, adidas, Siemens, Caribou Biosciences, eon, Airbus, Unicredit and UBS.

Business Policy and Strategic Management, 2e

Applied strategic management and business policy

The subject of Strategy is extremely complex and perhaps can be taught only

through the use of Cases. Unfortunately, most of the available cases in Strategic Management tend to be extremely long, which test more the patience rather than the intellectual rigour. This book thus fulfills the void in the literature by offering a bouquet of cases that are designed not only to test the operational understanding but the conceptual and intellectual discipline that the reader must inculcate to be a successful strategist. The book contains 24 cases, ranging from mammoth public sector organisations like SBI and SAIL to global corporations like Cray and Apple, as also the sublimely interesting episodes in the like of Phoolan Devi and Princess Diana. All the cases are extremely readable, and are designed to introduce the different aspects of Strategic Management to the reader. The book is a must read for students, strategists as well as practicing managers.
