The Absolutely True Diary of a Part-Time Indian

The groundbreaking classic that explores how women can and should negotiate for parity in their workplaces, homes, and beyond When Linda Babcock wanted to know why male graduate students were teaching their own courses while female students were always assigned as assistants, her dean said: "More men ask. The women just don't ask." Drawing on psychology, sociology, economics, and organizational behavior as well as dozens of interviews with men and women in different fields and at all stages in their careers, Women Don't Ask explores how our institutions, child-rearing practices, and implicit assumptions discourage women from asking for the opportunities and resources that they have earned and deserve—perpetuating inequalities that are fundamentally unfair and economically unsound. Women Don't Ask tells women how to ask, and why they should.

The Girl Most Likely To

Wanted: One young woman to take care of four-year-old boy. Must be cheerful, enthusiastic and selfless--bordering on masochistic. Must relish sixteen-hour shifts with a deliberately nap-deprived preschooler. Must love getting thrown up on, literally and figuratively, by everyone in his family. Must enjoy the delicious anticipation of ridiculously erratic pay. Mostly, must love being treated like fungus found growing out of employers Hermès bag. Those who take it personally need not apply. Who wouldn't want this job? Struggling to graduate from NYU and afford her microscopic studio apartment, Nanny takes a position caring for the only son of the wealthy X family. She rapidly learns the insane amount of juggling involved to ensure that a Park Avenue wife who doesn't work, cook, clean, or raise her own child has a smooth day. When the Xs' marriage begins to disintegrate, Nanny ends up involved way beyond the bounds of human decency or good taste. Her tenure with the X family becomes a nearly impossible mission to maintain the mental health of their four-year-old, her own integrity and, most importantly, her sense of humor. Over nine tense months, Mrs. X and Nanny perform the age-old dance of decorum and power as they test the limits of modern-day servitude. Written by two

former nannies, The Nanny Diaries deftly punctures the glamour of Manhattan's upper class.

The Psychosocial Implications of Disney Movies

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

The Girl Most Likely

Liz Jones is Fashion Editor of the Daily Mail, and a columnist for the Mail on Sunday. She is the former editor of Marie Claire, which sounds quite an achievement, but she was sacked three years in. A psychotherapist once told her, 'What you brood on will hatch', and she was right. Nothing Liz ever did in life ever worked out. Nothing. Not one single thing. Liz grew up in Essex, the youngest of seven children. Her mother was a martyr, her dad so dashing that no other man could ever live up to his pressed and polished standards. Her siblings terrified her, with their Afghan coats, cigarettes, parties, sex and drugs. They made her father shout, and her mother cry. Liz became an anorexic aged eleven, an illness that continues to blight her life today. She remained a virgin until her thirties, and even then found the wait wasn't really worth it; it was just one more thing to add to her to do list. She was named Columnist of the Year 2012 by the British Society of Magazine Editors, but is still too frightened to answer the phone, too filled with disgust at her own image to glance in the mirror or eat a whole avocado. She lives alone with her four

rescued collies, three horses and seventeen cats. Girl Least Likely Tois the opposite of 'having it all'. It is a life lesson in how NOT to be a woman.

Missoula, Montana, is home to a highly regarded state university whose beloved football team inspires a rabidly loyal fan base. Between January 2008 and May 2012, the Department of Justice investigated 350 sexual assaults reported by students to the Missoula police. Many of the alleged perpetrators played for the Grizzlies. Few of the cases were properly handled by either the university or local authorities. In Missoula, Krakauer chronicles the searing experiences of some of

the victims: the nights when they were raped; their fear and self-doubt in the aftermath; the way they were treated by police, prosecutors, and defense attorneys; their bravery in pushing forward and what it cost them. Krakauer's dispassionate, rigorously documented account of what these women endured cuts through the abstract ideological debate about campus rape. College-age women are not raped because they are promiscuous, or send mixed signals, or seek attention. They are the victims of a terrible crime, deserving of fairness from a justice system that is clearly broken.

As seen in Time, USA TODAY, The Atlantic, The Wall Street Journal, and on CBS This Morning, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today's rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older peers. Because where iGen goes, so goes our nation—and the world.
