For a long time, I have wanted to write this book to share my hard-earned secrets with the world on the secrets of the maintenance of cars as an engine reconditioner/mechanic. By trade, I have learnt many secrets of preventative maintenance to actually recondition an engine in a car and maintain it for hundreds of thousands of kilometres. I know that regular oil and filter changes and preventative maintenance make the difference between burning oil at one hundred kilometres and requiring a new engine and not burning any oil at four hundred kilometres because my maintenance schedule was followed following the recommendations under full servicing (chapter 3), and your car will last two and up to three times longer than normal, and if you want to restore or recondition any part of it, then it is all included in this book. Everything is outlined in fine detail on how to do everything. There are chapters in this book on servicing / engine reconditioning / transmission reconditioning / brakes / differential / clutches / painting and restoration of cars / stationary motors how to avoid the road toll / driving tips and techniques / checklist before driving / minor servicing / desert survival / refrigeration how to build your own refrigeration box / what can happen when you
