Solutions in Real Analysis

## **Difficulties in Arabic-English Translation**

This clearly structured guide will help learners who already have a basic grasp of Arabic to hone their translation skills. The texts chosen for translation exercises have been carefully selected from a variety of authentic, contemporary texts across a broad range of genres.

## **Comparative Stylistics of French and English**

A state-of-the-art volume highlighting the links between lexicography, terminology, language for special purposes (LSP) and translation and Machine Translation, that constitute the domain of Language Engineering. Part I: Terminology and Lexicography. Takes us through terminological problems and solutions in Europe, the former Soviet Union and Egypt. Part II focuses on LSP for second language learners and lexical analysis. Part III treats translator training in a historical context, as well as new methods from cognitive and corpus linguistics. Part IV is about the application of language engineering in Machine Translation, corpus linguistics and multilingual text generation.

## **Terminology, LSP, and Translation**

The book presents a comprehensive study of various

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

cognitive and affective aspects of web searching for translation problem solving. Research into the use of the web as an external aid of consultation has frequently occupied a secondary position in the investigation of translation processes. The book aims to bridge this gap in the literature. Beginning with a detailed survey of previous studies of these processes, it then focuses on web search behaviors using qualitative and quantitative analysis that presents a multifaceted overview of translation-oriented web searching. The book concludes by addressing the implications for the teaching of and research into translators' web searching skills. With regard to teaching, the book's didactic discussions will make it a valuable tool for both translator trainers and translation students wanting to familiarize themselves with the intricacies of Web searching and to reflect upon the pedagogical implications of the study for acquiring online information literacy in translator training.

### **Problems And Solutions On Optics (Second Edition)**

The definition of value or quality with respect to work in translation has historically been a particularly vexed issue. Today, however, the growing demand for translations in such fields as technology and business and the increased scrutiny of translators' work by scholars in many disciplines is giving rise to a need for more nuanced, more specialized, and more explicit methods of determining value. Some refer to this determination as evaluation, others use the term

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

assessment. Either way, the question is one of measurement and judgement, which are always unavoidably subjective and frequently rest on criteria that are not overtly expressed. This means that devising more complex evaluative practices involves not only quantitative techniques but also an exploration of the attitudes, preferences, or individual values on which criteria are established. Intended as an interrogation and a critique that can serve to prompt a more thorough and open consideration of evaluative criteria, this special issue of *The Translator* offers examinations of diverse evaluative practices and contains both empirical and hermeneutic work. Topics addressed include the evaluation of student translations using more up-to-date and positive methods such as those employed in corpus studies; the translation of non-standard language; translation into the second language; terminology; the application of theoretical criteria to practice; a social-textual perspective; and the reviewing of literary translations in the press. In addition, reviews by a number of literary translators discuss specific translations both into and out of English.

### **Solving 25 Problems in Unit Design**

This is the first book, within the interdisciplinary field of Nonverbal Communication Studies, dealing with the specific tasks and problems involved in the translation of literary works as well as film and television texts, and in the live experience of simultaneous and consecutive interpretation. The theoretical and methodological ideas and models it contains should

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

merit the interest not only of students of literature, professional translators and translatoologists, interpreters, and those engaged in film and television dubbing, but also to literary readers, film and theatergoers, linguists and psycholinguists, semioticians, communicologists, and crosscultural anthropologists. Its sixteen contributions by translation scholars and professional interpreters from fifteen countries, deal with discourse in translation, intercultural problems, narrative literature, theater, poetry, interpretation, and film and television dubbing.

### **Evaluation and Translation**

This unique book on ordinary differential equations addresses practical issues of composing and solving such equations by large number of examples and homework problems with solutions. These problems originate in engineering, finance, as well as science at appropriate levels that readers with the basic knowledge of calculus, physics or economics are assumed able to follow.

### **Multiple Voices in the Translation Classroom**

Explores the psychophysical and neurophysical determinants of cross-linguistic constraints on the shape of color lexicons.

### **Problems and Solutions**

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

Quantum computing and quantum information are two of the fastest growing and most exciting research fields in physics. Entanglement, teleportation and the possibility of using the non-local behavior of quantum mechanics to factor integers in random polynomial time have also added to this new interest. This book presents a huge collection of problems in quantum computing and quantum information together with their detailed solutions, which will prove to be invaluable to students as well as researchers in these fields. Each chapter gives a comprehensive introduction to the topics. All the important concepts and areas such as quantum gates and quantum circuits, product Hilbert spaces, entanglement and entanglement measures, teleportation, Bell states, Bell measurement, Bell inequality, Schmidt decomposition, quantum Fourier transform, magic gate, von Neumann entropy, quantum cryptography, quantum error corrections, quantum games, number states and Bose operators, coherent states, squeezed states, Gaussian states, coherent Bell states, POVM measurement, quantum optics networks, beam splitter, phase shifter and Kerr Hamilton operator are included. A chapter on quantum channels has also been added. Furthermore a chapter on boolean functions and quantum gates with mapping bits to qubits is included. The topics range in difficulty from elementary to advanced. Almost all problems are solved in detail and most of the problems are self-contained. Each chapter also contains supplementary problems to challenge the reader. Programming problems with Maxima and SymbolicC++ implementations are also provided.

### **Celestial Beaded Bookmark**

### **Damascius' Problems and Solutions Concerning First Principles**

As the 21st century gets into stride so does the call for a discipline combining culture and translation. This second edition of *Translating Cultures* retains its original aim of putting some rigour and coherence into these fashionable words and lays the foundation for such a discipline. This edition has not only been thoroughly revised, but it has also been expanded. In particular, a new chapter has been added which focuses specifically on training translators for translational and intercultural competencies. The core of the book provides a model for teaching culture to translators, interpreters and other mediators. It introduces the reader to current understanding about culture and aims to raise awareness of the fundamental role of culture in constructing, perceiving and translating reality. Culture is perceived throughout as a system for orienting experience, and a basic presupposition is that the organization of experience is not 'reality', but rather a simplified model and a 'distortion' which varies from culture to culture. Each culture acts as a frame within which external signs or 'reality' are interpreted. The approach is interdisciplinary, taking ideas from

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

contemporary translation theory, anthropology, Bateson's logical typing and metamessage theories, Bandler and Grinder's NLP meta-model theory, and Hallidayan functional grammar. Authentic texts and translations are offered to illustrate the various strategies that a cultural mediator can adopt in order to make the different cultural frames he or she is mediating between more explicit.

### **On Translation**

The main aim of this book is to provide teaching ideas that can be adapted to different learning environments and that can be used with different language combinations. The pedagogical approach and the activities, tasks and projects are based on Communicative, Humanistic and Socioconstructivist principles: the students are actively involved in their learning process by making decisions and interacting with each other in a classroom setting that is a discussion forum and hands-on workshop. Clear aims are specified for the activities, which move from the most rudimentary level of the word, to the more complicated issues of syntax and, finally, to those of cultural difference. Moreover, they attempt to synthesize various translation theories, not only those based on linguistics, but those derived from cultural studies as well. This volume will be of interest to translation teachers, to foreign language teachers who wish to include translation in their classes, to graduates and professional translators interested in becoming teachers, and also to administrators exploring the possibility of starting a new translation

programme.

## **Translation Solutions for Many Languages**

This book offers a challenging and stimulating perspective on translation. It is a comprehensive practical course in translation between English and Arabic and, as such, will be invaluable to students of translation. Based on contrastive linguistics, it features a variety of translation key concepts, including lexical, grammatical and stylistic issues. The book balances theory and application in translation. The book is the result of the many courses the author has taught to students of Arabic-English translation, and will help bilingual speakers become familiar with translation techniques and develop practical translation skills to the same standard as that expected of a university graduate. It presents a remarkable selection of examples of English/Arabic translation. Through lexical research, glossary building and an introduction to key theoretical concepts in translation, the reader will gain a better understanding of what graduate-level translation involves.

## **Moving Target**

This title features Greek text and English translation, plus fragments, of New Testament problems and solutions.

## **Basic Color Terms**

## **The Vernacular Aristotle**

"This book sets out to establish the state of the art of screen translation and at the same time to underscore the work of scholars following new paths of investigation both in terms of innovative linguistic mediations being examined and pioneering experimental design." "The volume includes descriptions of sophisticated electronic databases and corpora of audiovisual products for the big and small screen, and the rationale behind them. Furthermore, *Between Text and Image* also includes a number of cutting edge studies in audience perception of audiovisual products." "Finally, the volume does not fail to ignore examples of original research carried out from both a traditional linguistic viewpoint and from a more cultural perspective."--P. [4] de la couv.

## **Nonverbal Communication and Translation**

This volume is a compilation of carefully selected questions at the PhD qualifying exam level, including many actual questions from Columbia University, University of Chicago, MIT, State University of New York at Buffalo, Princeton University, University of Wisconsin and the University of California at Berkeley over a twenty-year period. Topics covered in this book include geometrical optics, quantum optics, and wave optics. This latest edition has been updated with more problems and solutions, bringing the total to over 200 problems. The original problems have been

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

modernized, and outdated questions removed, placing emphasis on those that rely on calculations. The problems range from fundamental to advanced in a wide range of topics on optics, easily enhancing the student's knowledge through workable exercises. Simple-to-solve problems play a useful role as a first check of the student's level of knowledge whereas difficult problems will challenge the student's capacity on finding the solutions.

### **Prose Translation**

This unique book provides a collection of more than 200 mathematical problems and their detailed solutions, which contain very useful tips and skills in real analysis. Each chapter has an introduction, in which some fundamental definitions and propositions are prepared. This also contains many brief historical comments on some significant mathematical results in real analysis together with useful references. Problems and Solutions in Real Analysis may be used as advanced exercises by undergraduate students during or after courses in calculus and linear algebra. It is also useful for graduate students who are interested in analytic number theory. Readers will also be able to completely grasp a simple and elementary proof of the prime number theorem through several exercises. The book is also suitable for non-experts who wish to understand mathematical analysis.

### **Advanced English-Arabic Translation**

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

This book contains a selection of more than 500 mathematical problems and their solutions from the PhD qualifying examination papers of more than ten famous American universities. The problems cover six aspects of graduate school mathematics: Algebra, Differential Geometry, Topology, Real Analysis, Complex Analysis and Partial Differential Equations. The depth of knowledge involved is not beyond the contents of the textbooks for graduate students, while solution of the problems requires deep understanding of the mathematical principles and skilled techniques. For students this book is a valuable complement to textbooks; for lecturers teaching graduate school mathematics, a helpful reference.

### **Translation as Problems and Solutions**

Focusing on the problems of translating English legal language, Alcaraz and Hughes offer a wide-ranging view of one of the most demanding and vital areas of contemporary translation practice. Individual chapters deal with legal English as a linguistic system, special concepts in the translation of legal English, the genres of legal translation, and offer a series of practical problems together with discussions of proposed solutions, as well as insight into the pragmatic ways translators go about finding solutions. The numerous examples and discussions of specific terms make the book useful both as a manual in the translation class and as an invaluable reference work for students, teachers, self-learners and professional translators.

### **Text Analysis in Translation**

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

The Stylistique comparée du français et de l'anglais has become a standard text in the French-speaking world for the study of comparative stylistics and the training of translators. This updated, first English edition makes Vinay & Darbelnet's classic methodology of translation available to a wider readership. The translation-oriented contrastive grammatical and stylistic analyses of the two languages are extensively exemplified by expressions, phrases and texts. Combining description with methodological guidelines for translation, this volume serves both as a course book and through its detailed index and glossary as a reference manual for specific translation problems.

### **After Babel**

Many “translation solutions” (often called “procedures,” “techniques,” or “strategies”) have been proposed over the past 50 years or so in French, Chinese, Russian, Ukrainian, English, Spanish, German, Japanese, Italian, Czech, and Slovak. This book analyzes, criticizes and compares them, proposing a new list of solutions that can be used in training translators to work between many languages. The book also traces out an entirely new history of contemporary translation studies, showing for example how the Russian tradition was adapted in China, how the impact of transformational linguistics was resisted, and how scholarship has developed an intercultural metalanguage over and above the concerns of specific national languages. The book reveals the intensely political nature of translation

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

theory, even in its most apparently technical aspects. The lists were used to advance the agendas of not just linguistic nationalisms but also state regimes – this is a history in which Hitler, Stalin, and Mao all played roles, Communist propaganda and imperialist evangelism were both legitimized, Ukrainian advances in translation theory were forcefully silenced in the 1930s, the Cold War both stimulated the application of transformational grammar and blocked news of Russian translation theory, French translation theory was conscripted into the agenda of Japanese exceptionalism, and much else.

### **Key Terms in Translation Studies**

### **100 Great Problems of Elementary Mathematics**

Following the theoretical framework Nida had developed over decades of work on translation and semiotics, the two authors offer an easily comprehensible analysis of the complex problems involved in translation. After a critical review of the historical development of translation theory in the light of modern information theory, they elucidate the most fundamental principles of translation in accordance with the concept of dynamic equivalence. The treatment is closely related to actual translation practice, and the principles elucidated are applicable to all types of translation, though most of the examples analyzed are taken from translations between Chinese and English. This new and expanded

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

edition has two main parts. Part I is the complete text of the original work as published in the early 1980s. Part II consists of six of Professor Jin's more recent essays, which provide further insights into the principle of equivalent effect and its applications in literary translation. Particular attention is paid to practical procedures and the extremely complex relationship between creative translation and real fidelity. Published by City University of Hong Kong Press. □□□□□□□□□□□□

### **Translation in Practice**

Problems that beset Archimedes, Newton, Euler, Cauchy, Gauss, Monge, Steiner, and other great mathematical minds. Features squaring the circle, pi, and similar problems. No advanced math is required. Includes 100 problems with proofs.

### **Eusebius of Caesarea: Gospel Problems and Solutions**

Through combining a knowledge of translation theory and application, the present book aims at holding a semantic comparison of four English translations attempted by Muhammad Marmaduke Pickthall, 'Abdullâh Yûsuf 'Alî, Arthur J. Arberry and Muhammad Mahmûd Ghâlî of Sûrat Ad-Dukhân (the Chapter of Smoke). As a theoretical framework, the book deals with several linguistic and cultural problems of translation, with special reference to Qur'ân translation, and the principles that should be considered on translating the Qur'ân. The core of the

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

book is a comparison of sixty-eight lexical, syntactic and stylistic selections from Sûrat Ad-Dukhân. The comparison depends on various Qur'ân interpretations and Arabic dictionaries to decide the precise meaning(s) of the selections. Then, a translation is suggested, and the four translations are judged: the correct ones are acknowledged and the mistaken shown, along with the reasons underlying the mistake(s). To reach the precise meaning in English and judge the translations compared accurately, many English dictionaries are utilized. The comparison shows that the best translation in terms of meaning precision and easiness of expression is that of Ghâlî, followed by Pickthall's, Arberry's and 'Alî's respectively.

### **A Comparative Study of Four English Translations of Sûrat Ad-Dukhân on the Semantic Level**

This is a collection of the most well-known English proverbs translated into Arabic. In this case, the book serves as a reference for Arab and Arabic-speaking students and learners alike as it includes over one thousand English proverbs arranged alphabetically with their Arabic equivalents and meanings.

### **One Thousand and One English Proverbs Translated into Arabic**

This book presents a collection of problems for nonlinear dynamics, chaos theory and fractals. Besides the solved problems, supplementary

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

problems are also added. Each chapter contains an introduction with suitable definitions and explanations to tackle the problems. The material is self-contained, and the topics range in difficulty from elementary to advanced. While students can learn important principles and strategies required for problem solving, lecturers will also find this text useful, either as a supplement or text, since concepts and techniques are developed in the problems.

### **Translating Expressive Language in Children's Literature**

Children's literature delights in made-up words, nonsensical terms, and creative nicknames, but how do you translate these expressions into another language?&ltBR> This book provides a new approach to translation studies to address the challenges of translating children's literature. It focuses on expressive language (nonsense, names, idioms, allusions, puns, and dialects) and provides guidance for translators about how to translate such linguistic features without making assumptions about the reader's capabilities and without drastically changing the work. The text features effective strategies for both experienced translators and those who are new to the field, including exercises and discussion questions that are particularly beneficial for students training to be translators. This learner-friendly book also offers original contributions to translation theory in light of the translation issues particular to children's literature.

## **Lectures, Problems And Solutions For Ordinary Differential Equations**

The first study of the reception of Aristotle in Medieval and Renaissance Italy that considers the ethical dimension of translation.

### **Discourse and the Translator**

Damascius was head of the Neoplatonist academy in Athens when the Emperor Justinian shut its doors forever in 529. His work, *Problems and Solutions Concerning First Principles*, is the last surviving independent philosophical treatise from the Late Academy. Its survey of Neoplatonist metaphysics, discussion of transcendence, and compendium of late antique theologies, make it unique among all extant works of late antique philosophy. It has never before been translated into English. The *Problems and Solutions* exhibits a thoroughgoing critique of Proclean metaphysics, starting with the principle that all that exists proceeds from a single cause, proceeding to critique the Proclean triadic view of procession and reversion, and severely undermining the status of intellectual reversion in establishing being as the intelligible object. Damascius investigates the internal contradictions lurking within the theory of descent as a whole, showing that similarity of cause and effect is vitiated in the case of processions where one order (e.g. intellect) gives rise to an entirely different order (e.g. soul). Neoplatonism as a speculative metaphysics posits the One as the exotic or extopic explanans for plurality, conceived as

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

immediate, present to hand, and therefore requiring explanation. Damascius shifts the perspective of his metaphysics: he struggles to create a metaphysical discourse that accommodates, insofar as language is sufficient, the ultimate principle of reality. After all, how coherent is a metaphysical system that bases itself on the Ineffable as a first principle? Instead of creating an objective ontology, Damascius writes ever mindful of the limitations of dialectic, and of the pitfalls and snares inherent in the very structure of metaphysical discourse.

### **The Georgetown Guide to Arabic-English Translation**

Curriculum design experts Jay McTighe and Grant Wiggins have reviewed thousands of curriculum documents and unit plans across a range of subjects and grades. In this book, they identify and describe the 25 most common problems in unit design and recommend how to fix them--and avoid them when planning new units. McTighe and Wiggins, creators of the Understanding by Design® framework, help you use the process of backward design to troubleshoot your units and achieve tighter alignment and focus on learning priorities. Whether you're working with local or national standards or with other learning goals, you can rely on their practical and proven solutions to promote deeper and better learning for your students.

### **Translating Cultures**

Discourse and the Translator both incorporates and

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

moves beyond previous studies of translation. Its logical and informative approach to the problems of translation ensures that it will be essential for all those who work with languages 'in contact'. Incorporating research in sociolinguistics, discourse studies, pragmatics and semiotics, the authors analyse the process and product of translation in their social contexts. Through this analysis, the book emphasises the importance of the translator as a mediator between cultures.

### **Legal Translation Explained**

Text Analysis in Translation has become a classic in Translation Studies. Based on a functional approach to translation and indebted to pragmatic text linguistics, it suggests a model for translation-oriented source-text analysis applicable to all text types and genres independent of the language and culture pairs involved. Part 1 of the study presents the theoretical framework on which the model is based, and surveys the various concepts of translation theory and text linguistics. Part 2 describes the role and scope of source-text analysis in the translation process and explains why the model is relevant to translation. Part 3 presents a detailed study of the extratextual and intratextual factors and their interaction in the text, using numerous examples from all areas of professional translation. Part 4 discusses the applications of the model to translator training, placing particular emphasis on the selection of material for translation classes, grading the difficulty of translation tasks, and translation

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

quality assessment. The book concludes with the practical analysis of a number of texts and their translations, taking into account various text types and several languages (German, English, Spanish, French, Italian, Portuguese, and Dutch).

### **Between English and Arabic**

In February 2008, editors and translators from the US and the UK came together at the British Council in London to discuss best practices for the translation of literary works into English. This book comprises the results of that meeting.

### **Between Text and Image**

Mughazy, a well-respected scholar of Arabic linguistics and a Georgetown Languages board member, takes a practical approach to the task of translating nonfiction from Arabic to English. Using Optimality Theory from linguistics, he provides a new way, based in linguistics, of looking at best practices for translation with the goal to find the most accurate translation. He aims to approach translation more scientifically (identify the problem, test hypotheses, selecting the best option and finding patterns) than those who use the more widely known literary translation theory. Although there are several books out on this topic, none address it as Mughazy has. This is a unique approach that offers a new, more practical way for those with advanced knowledge of Arabic to learn how to translate. As more schools begin or consider beginning translation programs, this

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

book may find a larger audience over the years. Mughazy's book is rich with authentic examples, exercises (answer key included), and includes very valuable appendices for the learner. As Clara told me, "This is a book I wish I had had in grad school."

### **Problems and Solutions in Mathematics**

Key Terms in Translation Studies gives a comprehensive overview of the concepts which students of translation studies are likely to encounter during their study, whether at undergraduate or postgraduate level. The book includes definitions of key terms within the discipline, as well as outlines of the work of key thinkers in the field, including Eugene A. Nida, Gideon Toury, Hans J. Vermeer, and Lawrence Venuti. The list of key readings is intended to direct students towards classic articles, as well providing a springboard to further study. Accessibly written, with complicated terms and concepts explained in an easy to understand way, Key Terms in Translation Studies is an essential resource for students.

### **Translation and Web Searching**

This book deals with the problems in translating literary prose and reveals some pertinent solutions and also concentrates on the need to expand the perimeters of Translation Studies. The translation courses offered at many universities in Bangladesh and overseas treat the subject mostly as an outcome of Applied Linguistics. Presently, the teachers and students of translation are confused at the mounting

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

impenetrability of the books and articles that flood the market. Unfortunately, the translators lay more emphasis on the translation of poetry; there should be more research regarding the particular problems of translating literary prose. One explanation of this could be the fact that the status of poetry is considered higher, but it is more possibly due to the notable flawed notion that the novels, essays, fiction etc. possess simple structures compared to that of a poem and is thus easier to translate. However, many debates have been organised over when to translate, when to apply the close local equivalent, when to invent a new word by translating clearly, and when to copy. Simultaneously, the "untranslatable" cultural-bound words and phrases have been continuously fascinating the prose-translators and translation theorists. The plea made in this book is to admit the fact that there is a lot to be learnt from shaping the criteria for undertaking a prose-translation and we should appreciate the hard work, difficulties, or frustration of the 'translators' (go-betweens) in the creation of good sense of the texts.

### **Political Discourse, Media and Translation**

This volume addresses the role played by translation in international political communication and news reporting and brings to light the usually invisible link between politics, media, and translation. The contributors explore the interrelationship between media in the widest sense and translation, with a focus on political texts, institutional contexts, and

## Acces PDF Translation As Problems And Solutions Hasan Ghazala

translation policies. These topics are explored from a Translation Studies perspective, thus bringing a new disciplinary view to the investigation of political discourse and the language of the media. The first part of the volume focuses on textual analysis, investigating transformations that occur in translation processes, and the second part examines institutional contexts and policies, and their effects on translation production and reception.

### **Problems and Solutions in Real Analysis**

Moving Target offers a rigorous exploration of the practice of translating for the theatre. The twelve essays in the volume span a range of work from Eastern and Western Europe, Canada and the United States. For the first time, this book draws together existing translation theory with contemporary practice to shed light on a hitherto neglected aspect of the production process. How does the theatre translator mediate between source text, performance text and target audience? What happens when theatre is transposed from one culture to another? What are the obstacles to theatre translation, and what are the opportunities? Central to the debate throughout is the role of the translator in creating not only a linguistic text but also a performance text, as the contributors repeatedly demonstrate an illuminating sensibility to the demands and potential of theatre production. Impacting upon areas of (inter)cultural theory as well as theatre studies and translation studies, the result is a startling revelation of the joys, as well as the frustrations of the dramatic art of the translator for

# Access PDF Translation As Problems And Solutions Hasan Ghazala

performance.
