Performance demands on the tenor exceed those of every other vocal category, often necessitating more vocal stamina and greater dramatic subtlety. Moreover, teaching the several categories of the tenor voice presents teachers of singing with a series of problems not encountered with any other voice

type. The tenor voice remains, in short, a mystery to most audiences and teachers alike. *Training Tenor Voices* presents a unique combination of historical and pedagogical information on how tenors sing. Designed as a practical program for singers, teachers, and voice professionals, the book places emphasis on the special nature of the tenor voice and the proper physiological functioning that leads to the establishment of vocal proficiency. It supplies practical information on instruction for each category of the tenor voice; recommends the kinds of literature to sing and to avoid; and provides an effective system for voice building, including registration factors, techniques for breath coordination, vowel modification ("covering"), resonance balancing, range extension, the development of vocal agility, and maintaining the high tessitura and sostenuto. The book also includes dozens of technical exercises; numerous anatomical illustrations; musical examples; the International Phonetic Alphabet (IPA) symbols; unique spectrographic analyses of such famous tenors as Jussi Bjoerling, Franco Corelli, Placido Domingo and Luciano Pavarotti; a glossary of terms; and a bibliography.

A compelling analysis of how "middling" Americans entertained themselves and how these entertainments changed over time. The changing

styles of middle-class home entertainments, Melanie Dawson argues, point to evolving ideas of class identity in U.S. culture. Drawing from 19th- and early-20th-century fiction, guidebooks on leisure, newspaper columns, and a polemical examination of class structures, *Laboring to Play* interrogates the ways that leisure performances (such as parlor games, charades, home dramas, and tableaux vivants) encouraged participants to test out the boundaries that were beginning to define middle-class lifestyles. From 19th-century parlor games involving grotesque physical contortions to early-20th-century recitations of an idealized past, leisure employments mediated between domestic and public spheres, individuals and class-based affiliations, and ideals of egalitarian social life and visible hierarchies based on privilege. Negotiating these paradigms, home entertainments provided their participants with unique ways of performing displays of individual ambitions within a world of polite social interaction. *Laboring to Play* deals with subjects as wide ranging as social performances, social history (etiquette and gentility), literary history, representations of childhood, and the history of the book.

"A psychological thriller regarding two detectives, Tony Morales and Melinda Roberts, explores the kidnapping and murders of children while also examining the detectives' personal and professional relationships. These characters' stories lead to an ending that is fascinating and offers a twist in its own right. The plot is well done and makes it difficult for the reader to figure out who is doing the killing, although various hints make it exciting to consider." -The US Review of Books

Microeconomics

In this comparative study of the contemporary politics of deportation in Germany and the United States, Antje Ellermann analyzes the capacity of the liberal democratic state to control individuals within its borders. The book grapples with the question of why, in the 1990s, Germany responded to vociferous public demands for stricter immigration control by passing and implementing far-reaching policy reforms, while the United States failed to effectively respond to a comparable public mandate. Drawing on extensive field interviews, Ellermann finds that these crossnational differences reflect institutionally determined variations in socially coercive state capacity. By tracing the politics of deportation across the evolution of the policy cycle, beginning with anti-immigrant populist backlash and ending in the expulsion of migrants by deportation bureaucrats, Ellermann is also able to show that the conditions underlying state capacity systematically vary across policy stages. Whereas the ability to make socially coercive law is contingent on strong institutional

linkages between the public and legislators, the capacity for implementation depends on the political insulation of bureaucrats.
