### Historians of Medieval India

Don't miss Country Proud, the second book in Linda Lael Miller's Painted Pony Creek series about three best buddies whose strength, honor and independence exemplify the Montana land they love. There's something missing from Eli Garrett's life. He loves being the sheriff of Painted Pony Creek, Montana, so it's not his job. He's had the same two best friends since he was a kid and he's grateful for them, so it's not that, either. But ever since his buddy Cord's recent marriage, Eli has a nagging suspicion that he wants what Cord has. And there's a beautiful woman who has caught his eye--someone who's returned to town that he can't get off his mind. Brynne Bailey is spirited and compassionate, and being with her makes Eli feel alive again. But he suspects there's more to her than she is letting on, and he is determined to get to the bottom of it.

The bestselling citizen's guide to economics Basic Economics is a citizen's guide to economics, written for those who want

to understand how the economy works but have no interest in jargon or equations. Bestselling economist Thomas Sowell explains the general principles underlying different economic systems: capitalist, socialist, feudal, and so on. In readable language, he shows how to critique economic policies in terms of the incentives they create, rather than the goals they proclaim. With clear explanations of the entire field, from rent control and the rise and fall of businesses to the international balance of payments, this is the first book for anyone who wishes to understand how the economy functions. This fifth edition includes a new chapter explaining the reasons for large differences of wealth and income between nations. Drawing on lively examples from around the world and from centuries of history, Sowell explains basic economic principles for the general public in plain English.

This concise and authoritative guide provides a complete survey of Islamic history and thought from its formative period to the present day. It examines the unique elements which have combined to form Islam, in particular the Qu'ran and the influence of Muhammad, and traces the ways in which these sources have interacted historically to create Muslim theology and law, as well as the alternative visions of Islam found in Shi'ism and Sufism. Combining core source materials with coverage of current scholarship and of recent events in the Islamic world, Andrew Rippin introduces this hugely diverse and widespread religion in a succinct, challenging and refreshing way. Using a distinctive critical approach which promotes engagement with key issues, from fundamentalism and women's rights to problems of identity and modernity, it is ideal for students seeking to understand Muslims and their faith. The improved and expanded third edition now contains brand new sections on twenty-first century developments, from the Taliban to Jihad and Al Qaeda, and includes updated references throughout.

## **Education in Africa in the Light of the Lagos Conference (1976)**

The Venture of Islam has been honored as a magisterial work of the mind since its publication in early 1975. In this three-volume study, illustrated with charts and maps, Hodgson traces and interprets the historical development of Islamic civilization from before the birth of Muhammad to the middle of the twentieth century. This work grew out of the famous course on Islamic civilization that Hodgson created and taught for many years at the University of Chicago. In this concluding volume of The Venture of Islam, Hodgson describes the second flowering of Islam: the Safavi, Timuri, and Ottoman empires. The final part of the volume analyzes the widespread Islamic heritage in today's world. "This is a nonpareil work, not only because of its command of its subject but also because it demonstrates how, ideally, history should be written."—The New Yorker

"Glorious."—Wall Street Journal Rescued from obscurity, Feynman's Lost Lecture is a blessing for all Feynman followers. Most know Richard Feynman for the hilarious anecdotes and exploits in his best-selling books "Surely You're Joking, Mr. Feynman!" and "What Do You Care What Other People Think?" But not always obvious in those stories was his brilliance as

a pure scientist—one of the century's greatest physicists. With this book and CD, we hear the voice of the great Feynman in all his ingenuity, insight, and acumen for argument. This breathtaking lecture—"The Motion of the Planets Around the Sun"—uses nothing more advanced than high-school geometry to explain why the planets orbit the sun elliptically rather than in perfect circles, and conclusively demonstrates the astonishing fact that has mystified and intrigued thinkers since Newton: Nature obeys mathematics. David and Judith Goodstein give us a beautifully written short memoir of life with Feynman, provide meticulous commentary on the lecture itself, and relate the exciting story of their effort to chase down one of Feynman's most original and scintillating lectures.

## **Internet Addiction Test (IAT)**

While the Internet is a relatively new technology, that has impacted the world, and provided many benefits, it has also had negative ramifications. Individuals unable to control their use are jeopardizing school, employment and relationships. The concept of "Internet Addiction" is used to explain uncontrollable, damaging use of technology. It is characterized as an impulse control disorder, comparable to pathological gambling, because of overlapping diagnostic criteria and symptomatology. Based on these studies, the IAT was constructed to capture the problematic behavior associated with compulsive use of technology, including online porn, internet gambling and compulsive use of online games and social media. The Internet Addiction Test emerged as the first validated measure of Internet and technology addiction. The assessments can be administered in a variety of mental health settings, including private practice clinics, schools, hospitals and residential programs. They can be used when there is suspicion of Internet addiction, as part of a broad intake assessment, or for use in a wellness curriculum to help participants evaluate their own Internet behavior. The IAT can also be a valuable pre-employment screening device, to detect internet addiction among job candidates, to improve productivity and reduce corporate liability. Based on 20 self-report items, the IAT assesses for the presence of addiction to the Internet, electronic entertainment, social media, and general use of electronic devices, and also measures the severity of addiction,

in terms of mild, moderate or severe. Furthermore, because Internet addiction may be driven by different reasons and manifest in different ways, requiring different types of treatment, the IAT produces scores related to the following areas: EscapeCompulsionNeglecting dutiesAnticipationLack of ControlSocial Avoidance

"An Inquiry into the Nature and Causes of the Wealth of Nations (generally referred to by the short title The Wealth of Nations) is the masterpiece of the Scottish economist and moral philosopher Adam Smith. It was first published in 1776. It is an account of economics at the dawn of the Industrial Revolution, as well as a rhetorical piece written for the generally educated individual of the 18th century - advocating a free market economy as more productive and more beneficial to society. The book is often considered to have laid the basic groundwork for modern economic theory" -- from Wikipedia.

In this sweeping saga of love, loss, revolution, and the resilience of the human spirit, Amba must find the courage to forge her own path. Amba was named after a tragic figure in Indonesian mythology, and she spends her lifetime trying to invent a story she can call her own. When she meets two suitors who fit perfectly into her namesake's myth, Amba cannot help but feel that fate is teasing her. Salwa, respectful to a fault, pledges to honor and protect Amba, no matter what. Bhisma, a sophisticated, European-trained doctor, offers her sensual pleasures and a world of ideas. But military coups and religious disputes make 1960s Indonesia a place of uncertainty, and the chaos strengthens Amba's pursuit of freedom. The more Amba does to claim her own story, the better she understands her inextricable bonds to history, myth, and love."

## **The Charismatic Leader**

Based on the concept of charisma formulated by Max Weber and developed by recent writers, this second revised edition concentrates on 'personality-related' and 'situational' factors that led to the emergence of Quaid-i-Azam Mohammad Ali Jinnah as the charismatic leader of Muslim India and sustained and strengthened him in that role to help create the separate state of Pakistan. While a few authors have dubbed Jinnah as a charismatic leader, hardly any one has defined or discussed the concept of charisma methodically or employed it systematically to analyse his charisma and charismatic leadership. In this sense, the present study is distinct and makes an original and unique contribution to the scholarly literature on Jinnah's political leadership. Dr Roger D. Long, a distinguished American historian on South Asia, thus acknowledged: 'Dr Hayat's analysis of Jinnah as a charismatic figure fills an important lacuna in the field'. Hence, this study will help interested, informed readers to see Jinnah in a new, fuller, and refreshing light. They will see a new Jinnah: The Charismatic Leader!
