Seawifs Technical Report Series. Volume 38; Seawifs Calibration and Validation Quality Control Procedures

So much writing about architecture tends to evaluate it on the basis of its intentions: how closely it corresponds to the artistic will of the designer, the technical skills of the builder, or whether it reflects the spirit of the place and time in which it was built, making it not much more than the willful (or even subconscious) assemblage of objects that result from design and construction techniques. Renowned writer and thinker David Leatherbarrow, in this groundbreaking new book, argues for a richer and more profound, but also simpler, way of thinking about architecture, namely on the basis of how it performs. Not simply how it functions, but how it acts, "its manner of existing in the world," including its effects on the observers and inhabitants of a building as well as on the landscape that situates it. In the process, Leatherbarrow transforms our way of discussing buildings from a passive technical or programmatic assessment to a highly active and engaged examination of the lives and performances, intended and otherwise, of buildings.

The U.S. Economy

The rallying cry "We need a show" was the first step of a fifty-year journey that led to World Dairy Expo, as we know it today. The show's growth and development into the world's most-respected and most-renown dairy event is, indeed, a success story. We Need a Show is the story of that successful journey. We learn about what led up to the need for a new show. We gain insight into Expo's early struggles and how it found solid footing. We come to appreciate how the fabled event established high standards as a cattle show and trade show. We see how Expo continued to innovate and adapt to a changing industry. The story is told in terms of the key aspects of World Dairy Expo the cows, the trade show, the events and the people. And we look ahead to the challenges and opportunities in Expo's future.

In Pura vida (Life is good)Spanish is more than vocabulary and grammar, just as Spanish-speaking cultures are more than products and practices. In this learner-centered introductory program, the authors' commitment to a methodology based

on true-to-life experiences brings Spanish to life. Pura vida is the discovery of a Spanish-speaking world through the experiences of real people who share anecdotes and reflections on those experiences. Students relate to these people and make deeper, more meaningful connections between language and culture, and acquire Spanish with an unparalleled sense of personal engagement. In this 12-chapter introductory program, students don't only learn Spanish for real life, but also from real life. They discover that there is not just one homogeneous Hispanic culture, but rather that each Spanish-speaking country has its own rich, unique culture and that the people who live in these countries speak one common language with different accents, characteristics, and idiosyncrasies. The program offers truly seamless integration of cultural notions and language instruction and features 100% contextualized and personalized activities.

Ditch the Pitch

Theological Method: A Guide for the Perplexed is a book that introduces the reader to the practice of doing theology. It provides a historical survey of key figures and concepts that bear on an understanding of difficult methodological issues in Christian theology. Beginning with a description of philosophical themes that affect the way theology is done today, it summarizes the various theological methods deployed by theologians and churches over two millennia of Christian thought. The book uncovers patterns in the theological task of relating biblical texts with beliefs and doctrines, according to historically conditioned theological and cultural priorities. The book's highlights include a discussion of Augustine's epoch-making *De doctrina Christiana*. Also receiving close attention is the relationship between philosophy and theology during the Middle Ages, the meaning of *sola scriptura* for the Protestant Reformers, the methods of key interpreters of doctrine in the nineteenth century and the theological priorities of the 'Radical Orthodoxy' movement.

At the End of Days

The Bios Companion

After years of speaking and writing bestsellers on the value of having a positive attitude, motivational speaker Zig Ziglar is faced with putting his words into action after a fall leaves him with a head injury. In *Embrace the Struggle*, Ziglar shares a personal account of his accident and offers encouragement through his firsthand experience of overcoming his most difficult challenge. One of the leading stars in the "positive thinking" movement, Zig Ziglar has made a career out of telling people how to have a positive attitude, no matter what their circumstances are. But when a fall down a stairway onto a marble floor leaves him with a head injury, he is challenged with how to put the principles he'd been speaking about into practice. Ziglar's willingness to be transparent has him back writing and speaking with renewed energy before audiences in the tens of thousands to show that life on life's terms is still well worth living. *Embrace the Struggle* affirms the validity of the principles Ziglar has held true his entire life and includes not only his account of living positively through difficult circumstances; it also includes heartwarming stories of real people who encouraged him with how they put into practice these vital principles.

The Third Gift

As voters articulate their judgments of the parties and leaders in their fifth democratic election, *Election 2014 South Africa: The Campaigns, Results & Future Prospects* provides a platform for in-depth discussion and analysis of party campaigns, voting patterns, and election results of the 2014 general elections. Following the tradition of previous volumes that cover South Africa's national and provincial elections since 1994, this book draws on the expertise of renowned authors to cover important aspects of the election, including the major political party campaigns, the media's coverage of the campaigns, the latest trends in political participation and party fortunes, gender dynamics, the black middle class, as well as insights into the voter and public opinion on the eve of the election. Readers are presented with more than a mere study of a single election; they are also presented with a contemporary understanding of electoral politics and democracy in South Africa over two democratic decades and reflections on how elections strengthen the quality and prospects for democracy.

To read the books of Virginia Stem Owens is to understand what Dylan Thomas

once called "the mystery of having been moved by words." Her style is contemplative, ecstatic, tender – always yearning for a purer vision of reality and grace. *Wind River Winter* is her account of watching the world die and be reborn in the desolate Wind River mountains of Wyoming. By attuning her mind to the enormous cadence of autumn and winter, she contemplates the balance of life and death—the world's and her own. Her writing, as beautiful as the best of Annie Dillard or John McPhee, will appeal to anyone who finds the power of language as awesome a power as nature itself. Virginia Stem Owens is the author of several books, including the critically acclaimed *Feast of Families*. She is a frequent contributor to the *Reformed Journal* and other publications. She lives near Huntsville, Texas.

Wolf's Coming!

This document provides five brief reports that address several quality control procedures under the auspices of the Calibration and Validation Element (CVE) within the Sea-viewing Wide Field-of-view Sensor (SeaWiFS) Project. Chapter 1 describes analyses of the 32 sensor engineering telemetry streams. Anomalies in any of the values may impact sensor performance in direct or indirect ways. The analyses are primarily examinations of parameter time series combined with statistical methods such as auto- and cross-correlation functions. Chapter 2 describes how the various onboard (solar and lunar) and vicarious (in situ) calibration data will be analyzed to quantify sensor degradation, if present. The analyses also include methods for detecting the influence of charged particles on sensor performance such as might be expected in the South Atlantic Anomaly (SAA). Chapter 3 discusses the quality control of the ancillary environmental data that are routinely received from other agencies or projects which are used in the atmospheric correction algorithm (total ozone, surface wind velocity, and surface pressure; surface relative humidity is also obtained, but is not used in the initial operational algorithm). Chapter 4 explains the procedures for screening level-1, level-2, and level-3 products. These quality control operations incorporate both automated and interactive procedures which check for file format errors (all levels), navigation offsets (level-1), mask and flag performance (level-2), and product anomalies (all levels). Finally, Chapter 5 discusses the match-up data set development for comparing SeaWiFS level-2 derived products with in situ observations, as well as the subsequent outlier analyses that will be used for evaluating error sources. Hooker, Stanford B. (Editor) and Firestone, Elaine R.
