The Pistol P. 38

Adopted by the German Wehrmacht at the end of 1939, more than 1.2 million P.38s were manufactured up to 1945. Designed by the Walther company from its civilian model PP, it was the first double-action military pistol. Its robustness and simplicity of manufacture made it a worthy successor to the legendary P.08 Luger in the Second World War. This illustrated book presents the design, manufacturing, and development of the various models, from initial acceptance by the German military in 1938 through their production and use from 1939 to 1945. Details include close-up views of markings and other details, as well as a visual breakdown of the weapon. Accessories such as magazines, ammunition, holsters, and cleaning kits are featured throughout the book, as are rarely seen combat-related uniform and equipment items.

The Construction of Secret Hiding Places

This is the first English translation, from the original German of 1838, of the first textbook of plastic surgery. Its author, a practicing surgeon who actually introduced the term 'plastic surgery, ' was also the first historian of the field. He included a detailed review of all the literature of his time as well as of the early history of reconstructive operations, extending back to the fifteenth century in Europe, and earlier in India. In addition to its interest as a historical document, this work is an early example of medical specialization, which the author viewed as a progressive force that could be encouraged by collecting relevant background

material and presenting it along with practical instruction in a single volume. Medical historians and those with an interest in the early development of plastic surgery will value this fascinating account.

SCP Series Two Field Manual

Patented in 1898 and produced from 1900, Georg Luger's iconic semi-automatic pistol became synonymous with Germany's armed forces throughout both world wars. Initially chambered for the 7.65×21mm round, from 1902 the Luger was designed for DWM's 9×19mm round, which even today remains the most popular military handgun cartridge. It was adopted by the Imperial German Navy in 1904, followed by the German Army in 1908, receiving the name Pistole 08. Despite being supplanted by the Walther P38, the Luger remained in widespread service with all arms of Nazi Germany's armed forces throughout World War II, and even equipped East Germany's Volkpolizei in the years after 1945. Featuring full-colour artwork, expert analysis and archive and present-day photographs, this engaging study tells the story of the Luger, the distinctive and deadly semi-automatic pistol that has come to symbolize Germany's armed forces in the 20th century.

Shooter's Bible, No. 85

The distinctive look of the Luger and its role in German military history make it the world's most famous handgun. In *Luger*, renowned gun expert John Walter traces the history of this semiautomatic pistol from an early design by Hugo Borchardt in the 1890s through its use in the trenches of the First World War to the final days of the Third Reich in WWII. Other books on the Parabellum-Pistole, as the Luger was also known, focus strictly on narrow subjects like manufacturing details or accessories. While still offering the technical details to satisfy the collector, Walter provides a comprehensive narrative history. Readers will learn of the initial collaboration between Borchardt and Georg J. Luger, who patented the design in 1898. Following initial adoption by the Swiss Army, design refinements convinced the Imperial German Navy to order the sidearm, while the US Army passed on it following field trials in favor of the Colt. Production ramped up for World War I and the gun became a prized trophy for Allied soldiers in both that conflict and World War II. (German soldiers, aware of their desirability, even used them as bait for booby traps.) Today, it is still desired by collectors both for its unique design and for its connection to the history of Nazi Germany, and *Luger: The Story of the World's Most Famous Handgun* tells how it came to be.
