Children's Books

They're hallmarks of childhood. The endless "why" questions. The desire to touch and taste everything. The curiosity and the observations. It can't be denied-children have an inherent desire to know. Teachers and parents can either encourage this natural inquisitiveness or squelch it. There is joy in the classroom when children learn-not to take a test, not to get a grade, not to compete with each other, and not to please their parents or their teachers-but because they want to know about the world around them! Both Christian educators and parents will find proven help in creating a positive learning atmosphere through methods pioneered by Charlotte Mason that show how to develop a child's natural love of learning. The professional educators, administrators, and Mason supporters contributing to this volume give useful applications that work in a variety of educational settings, from Christian schools to homeschools. A practical follow-up to Crossway's *For the Children's Sake*, this book follows a tradition of giving serious thought to what education is, so that children will be learning for life and for everlasting life.

step guide that teaches parents how to instill discipline in their child. A child must possess certain values, attitudes or skills for him to be successful in life. Each is thoroughly explained and a step by step guide is provided for the implementation. Many true-to-life experiences are shared. Knowing your childs learning style and learning how to motivate him is an essential part in the growth process. Also, parents may experience several problems when instilling discipline. Every problem is explained and a possible solution is presented. Once you have embarked on the discipline process, you will see some transformation in your childs behavior. Your childs potential will slowly be unleashed. Initially, the improvement may be slow. After some time, you will see the transformation of your childs behavior. Over time, he will learn to be responsible and independent. This will help him become a successful person. Teacher Laxmi, the author, went through her own process of being disciplined. She tried to understand what her students were experiencing and wanted to experience the same thing. In the process, she grew as a person. She became more responsible and independent. After discovering the discipline process, she realized that it was important for her to share her experiences with everyone. Happy Reading!

The life he knew the day before was long gone Who will protect his mother now? The future of our civilization has always been in the hands of our children. What you may not know is that many years ago, a few of our young ones fought a quest against evil-an evil unlike anything anyone has ever seen under this sun. They didn't know it, but their sacrifices allowed our forefathers-and us-to maintain our fragile ownership of this world. In *Seven & Two*, the first book of the *Our Young Guardians* series, we begin the chronicle of one who was brave enough to leave behind what he knew. His faded handwriting not only captures how they struggled through that war, but how they learned to find themselves as they grew up away

To Learn with Love

This enduring classic of educational thought offers teachers and parents deep, original insight into the nature of early learning. John Holt was the first to make clear that, for small children, “learning is as natural as breathing.” In this delightful yet profound book, he looks at how we learn to talk, to read, to count, and to reason, and how we can nurture and encourage these natural abilities in our children.”

When You Worry About the Child You Love

Being a parent is more challenging today than it's ever been. In *All About Children*, this thoroughly reliable and effective handbook, clinical psychologist Dr Tony Humphreys outlines effective ways of parenting and positive responses to difficult behaviour by children. Sometimes the task of parenting seems overwhelming. At others it provides great fulfilment and joy. It is always unpredictable; the challenges are forever changing and much of what we might have learned from our own parents seems quite irrelevant now. Parenting is not learned by instinct; it requires many complex skills. Parents have responsibility for the physical, emotional, social, sexual, behavioural, educational, creative and spiritual development of their children, and at the same time they must love them unconditionally. Tony Humphreys recognises the many and varied challenges faced by parents today. In *All About Children*, he provides an invaluable resource for parents by taking the questions they most frequently ask and providing thoughtful and comprehensive answers. He begins by pointing out that in order to develop parenting skills, each parent must first understand themselves and be prepared to continually update their knowledge as the needs of their children alter as they grow older. He goes on to deal with the practical aspects of everyday parenting skills and then looks at different aspects of challenging behaviour, both by children and parents. The book concludes with a chapter on learning and education, two core concerns of every parent. In a helpful question-and-answer

format, All About Children provides today's parents with not only the vital information they require but also points out the skills they need to carry out their demanding task effectively. All About Children: Table of Contents Introduction Where does parenting begin? What roles do parents need to play? What are the skills needed for everyday parenting? How can parents best respond to children's challenging behaviours? How can parents resolve their own challenging behaviours? How can parents prepare children for living their lives fully?

What's Math Got to Do with It?

Should you feed your baby whenever she wants or put her on a schedule? Do you impose consequences on children who don't do their homework or clean up their room, or do you help them with chores and homework? Should you respond to the difficult adolescent with tender love or tough love? Parents are faced every day with a multitude of decisions, and they worry about making the right choices. The Smart Love Parent offers a breakthrough method to parenting created and tested by the husband-and-wife team of Dr. Martha Heineman Pieper and Dr. William J. Pieper. The Piepers offer a new understanding of the entire sweep of child development, allowing you to view the process of growing up through your child's eyes. Their patient and caring approach avoids the extremes of permissiveness and of the old reward-and-punishment style of parenting that turns parents into disciplinarians. By offering a relaxed and realistic timetable for your child's

development, they identify some previously unrecognized developmental milestones and show you how to help your child reach them through guiding, not punishing. If you understand your child's point of view, you can better know how to love her and how to respond to her actions. The Smart Love Parent helps parents cultivate a child's inner happiness, which is the best means of ensuring your child will grow up well behaved, responsible, self-confident, and able to reach his or her fullest potential. Children's Classic Books

The attitude of a person measures the altitude of his or her success and happiness. Success, and as a resultant happiness, is not determined by how much you earn or what is your status in society. It is determined by whether or not you achieve your chosen goals in life and how you view them. Each person's goals are different. Therefore it is essential for every individual to crystallize his or her vision in order to develop his/her own paradigm and path to success. And this book presents a practical guide to achieve success and happiness in life. Much of what is written is based on the author's own experiences and the philosophy which he has developed by active interaction with others as well as the study of the writings and experiences of great personalities across the world.
